* Corresponding Author

Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature four articles for this third issue in third volume of JPT as below:

- *Design and Analysis of a Smart Door-lock System Supporting Automatic Time Schedule*
by Jin-Young Jung, Sangook Moon
- *User Location Determination Using Wireless AP Access Information*
by Bongen Gu
- *Maximum Height Selection Scheme for Rank-3 OSM in Closed-loop MIMO Systems*
by Changick Song, Subin Eom
- *A Survey on Usability Aspects of Ubiquitous Computing*
by Serap YAĞMUR

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Seungmin Rho). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
