Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *Design of Millimeter-wave Pyramidal Horn Antenna with Dielectric Slab*
by Dong-Hee Park
- *On Feature based Delaunay Triangulation for Palmprint Recognition*
by Zanooby N. Khan, Rashid Jalal Qureshi and Jamil Ahmad
- *A New Transmission Rate Upper Bound of HK Scheme for Interference System with M-QAM*
by Fan Tingting, Yang Wei, Xu Changlong, Young-il Kim
- *Implementation of BigData Analysis System for EMS*
by Junseok Park, Sanghyuck Lee, Hyunil Lee, Byungchul Lee
- *An Approach to Build an Efficient Intrusion Detection Classifier*
by Thi-Thu-Huong Le, Jihyun Kim, Jaehyun Kim, Howon Kim
- *Biometric Keystroke Authentication: A Survey*
by Firdous Kausar, Alanoud Mohammad AlAbdulhadi, Areen Nasser AlYahya, Sarah Abdullatif AlSarami
- *Password Hashing Algorithms - From Past to Future*
by Tran Song Dat Phuc, Changhoon Lee
- *A Platform for Real-Time Measurement and Analysis of Electroencephalogram*
by Jeadong Lee, Yong-Hwan Lee

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of

JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Seungmin Rho). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
