Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature four articles for the first issue in the fourth volume of JPT as below:

- *Survey on Industrial Wireless Network Technologies for Smart Factory*
by Jieun Jang, Eui-Jik Kim
- *A Trend Survey on Smart Grid Technology Development*
by Kyoung-Mi Im, Jae-Hyun Lim
- *The Experimental Analysis on the Temperature Profile for the Efficient Packaging of Agricultural Products*
by Min-Jung Lee, Nam-Jin Bae, Ki-Hyun Lee, Kyoung-Sook Jung
- *A Comparative Study on the Development of K-MOOC Platform*
by SangHyun Jang

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Seungmin Rho). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
