Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *Proposal of Collective Handover Processing Method using Network Mobility (NEMO) in SDN environment*
by Pill-Won Park
- *IP&SF: Indoor Position and Service Framework by using Information about BLE-based Beacons in Indoor Rooms*
by Bongen Gu
- *The Study on Convergence Platforms and Services for Next Command and Control Systems in Korea Military*
by Inkeun Son, Daesik Ko, Seungduck Lim, Seungho Kong
- *A Structural Shape Based Palmprint Recognition*
by Zanooby Khan, Jamil Ahmad, Zahoor Jan, Hamid Jan

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Seungmin Rho). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
