\* Corresponding Author

Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *Efficient IoT interfacing method for broad communication systems based on context awareness*  
by Hyoung-Jun Park, Moon-Ho Lee, Sung Chang Kim, Chan Il Yeo
- *Fuzzy logic based motion management system for the robot soccer of multiple humanoid robots*  
by Ha-Ram Lee, Seung-Whan Kim, Hye-Lee Lee, Kang-Seon Song, Rae-Geun Park, Tae-Koo Kang, Dong W. Kim
- *Triple evaluation platform development for university curriculum implementation improvement*  
by Hyeonae Sim
- *A robust and adaptive ambient services management scheme for smart homes*  
by Chun-Feng Liao, Ya-Wen Jong, Li-Chen Fu
- *Design of waveguide pyramidal horn antenna using microstrip patch-fed for millimeter-wave applications*  
by Dong-Hee Park
- *Designing an optimal temperature profile to develop effective insulation packaging materials*  
by Yunseong Bae, Daesik Ko
- *Instruction based packet processing scheme for programmable SDN data plane*  
by Kiwook Kim, Pill-Won Park, Sung-Gi Min

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Seungmin Rho). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
