* Corresponding Author

Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *Monte Carlo Localization Using the Filter-Based Random Motion Model in Wireless Sensor Networks*
by Jung Min Park, Dong Won Kim
- *USRP and LabVIEW: A Flexible Software Defined Radio-based UHF RFID Reader*
by Yuechun Wang, Robert G. Maunder, Dawei Liu, Ka Lok Man
- *Study on RFID based Smart Cold Chain System*
by SangHak Lee
- *ICT Governance Restructure Plan in the era of 4th Industrial Revolution*
by Choong-Sik Chung
- *A Direction for Promoting IoT/Cloud-based Informatization for the 4th Industrial Revolution*
by Dae Sik Ko
- *Holistic Framework and Application Suite for the Knowledge Service: Focused on the Management of Verbal Knowledge*
by Keedong Yoo

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Dae Sik Ko). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
