\* Corresponding Author

Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *From Electronic Government to Platform Government*  
by Choong-Sik Chung
- *Coding Education with Physical Computing based on Visual Programming Toolkit and Open Hardware*  
by Yong-Ho Seo
- *International Joint Research Promotion Strategy of Sensor Industry for Leading the 4th Industrial Revolution*  
by Jaehyuk Cho, Youngsik Na
- *OTP without a Secret key Exchange*  
by Yunhwa Chong, Young B. Park
- *A Study on the Network Design for IoT services in Mountain Area*  
by Daesik Ko, Donghan Lee, Pill-Won Park
- *Construction of E134 Enabled EDA System for Smart Factory*  
by Yunhee Kang
- *A Study on Establishment of System Wide Information Management*  
by Jong-Chul Eum, Baek-Ki Kim, Hwan-Seok Kim

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Dae Sik Ko). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
