\* Corresponding Author

Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *Recognition of virtual written characters based on convolutional neural network*  
by Seungmin Leem, Sungyoung Kim
- *Design and construction of analysis system using R*  
by Youngoh Kwon, Youngsam Jin, Youngchul Bae
- *Taxi stand approach sequence management system to reduce traffic jam and congestion around taxi stand*  
by Bongen Gu, Kwondong Lee, Sangtae Lee
- *LMT diagnosis assistance system for art therapy*  
by Hyeongyeong So, Younghoon Seo

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Dae Sik Ko). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
