* Corresponding Author

Journal of Platform Technology (JPT) aims to promote interdisciplinary research in platform technologies and other applied fields in mathematics, engineering and sciences to investigate specific methodologies and develop technologies that will contribute to the development of the future infrastructure.

We are honored to feature eight articles for the last issue in third volume of JPT as below:

- *Research practices on Integrated Architecture based on REST API*
by Hyun-Sik An, Bo-Kyung Park, Young-Chul Kim, Jae-Hyub Lee
- *A Study on the Response of Skin Skin Skin Facade Using High Pressure Oxygen Chamber*
by Rog-Gook Park, Keun-Sik Min, Jung-Min Chun
- *IoT based Data centric sensory data aggregation environment*
by Myoung-Woo Hong, Yun-Hee Kang

We believe that these articles have good quality and the relevance that we expect for developing JPT. Finally, we would like to thank all authors, reviewers, and members of the editorial board of JPT. Authors are welcome to submit papers relevant to the scope of the JPT (Journal of Platform Technology) at any time. The JPT submissions and reviews are conducted via journal submission system which is available at <http://jpt.ictps.org/>. We also welcome proposals for Special Issues, which should be submitted to the EiC (Editor-in-Chief; Prof. Dae-sik Ko). The journal's website is <http://jpt.ictps.org/> and online articles are available at the website in PDF format.
